

H. Ahmadian Prize

In Experimental Vibration and Acoustics

- ✓ Prize for excellence in **experimental research**.
- ✓ 3 winners, receiving a total of **400 M IRR** prize.
- ✓ Competition through submitting the research work as **manuscripts for review under JTAVA**.

Introduction

The prize is given in honour of the late Hamid Ahmadian, Professor of Vibration Engineering at Iran University of Science and Technology (IUST), a founding member of the Iranian Society of Acoustics and Vibration (ISAV) and the founding editor-in-chief of JTAVA who led the journal from its launch in 2014 until 2021.

How to participate

- Your research work in Experimental Vibration and Acoustics should be submitted as a manuscript for the review process under JTAVA, until **6 October 2024** (about 2 months before The 14th International Conference on Acoustics and Vibration (ISAV2024), Dec. 2024). This deadline is extended to 16 October 2024.
- Participant manuscripts will go through a fast-track review process for possible publication under a special section of JTVA at the same time as competing for 3 prizes worth **250 M**, **100 M** and **50 M IRR**.

Selection Criteria

- Scientific quality in terms of originality, significance and rigour.
- Research outputs will be evaluated based on containing;

1. Theoretical development of dynamic models	Theoretical Basis
2. Analytical, semi-analytical and numerical solution methods	
3. Design, construction and start-up of test-rig for experimental studies	Experimental Validations
4. Tests and experimental analyses	
5. Results validation by laboratory experiments	
6. Demonstration of industrial significance for the results	Field Tests
7. Industrial implementation of principal findings	
- Faculty members as the corresponding author of a participant manuscript at their first 20 yrs of employment will receive +10% points in evaluations.
